

# Web Station for Physician's & CPOE

Log in to the following site and bookmark it for easy access in the future:

<https://lhpvwrk.lhphospitalgroup.com/smchvwrk>

Brings you to this screen:

Seton Medical Center  
Harker Heights  
A partner of the Seton Healthcare Family

User Name:

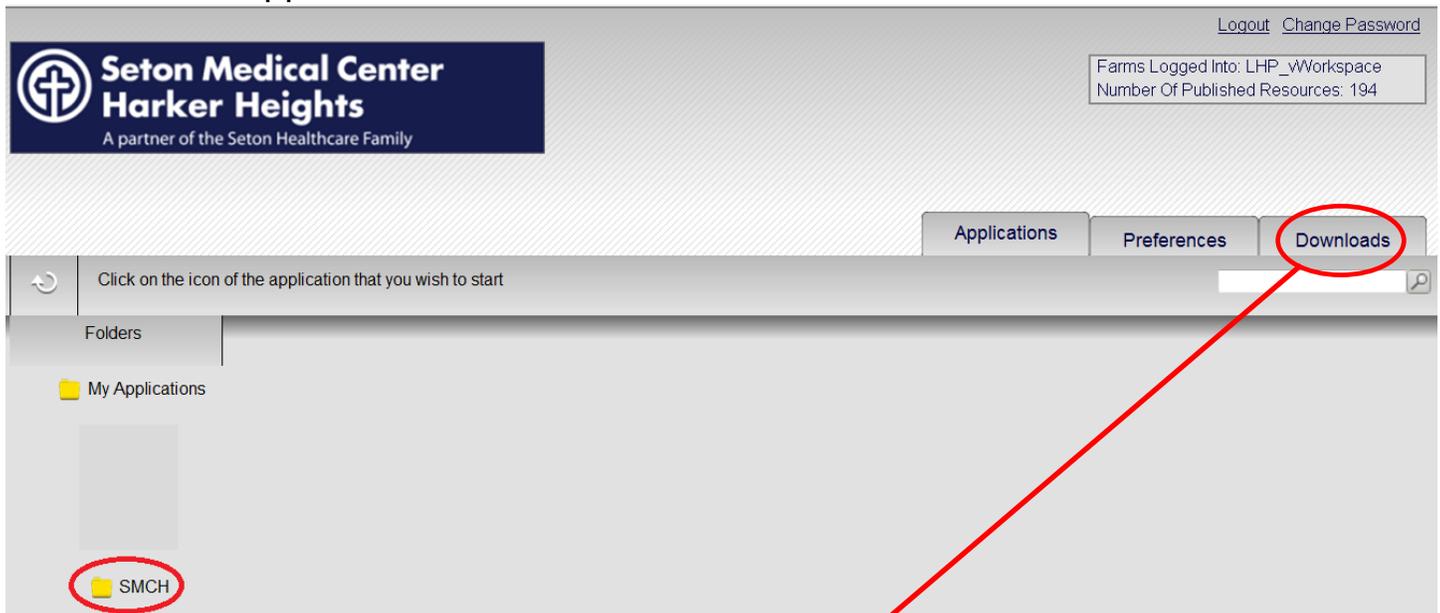

Password:

Use Connector for Java

Login

Enter in your Username (first name.last name) and Password, (default is SMCuser2014) then click the “Login” button.

This screen will appear:

Logout Change Password

Farms Logged Into: LHP\_vWorkspace  
Number Of Published Resources: 194

Applications Preferences Downloads

Click on the icon of the application that you wish to start

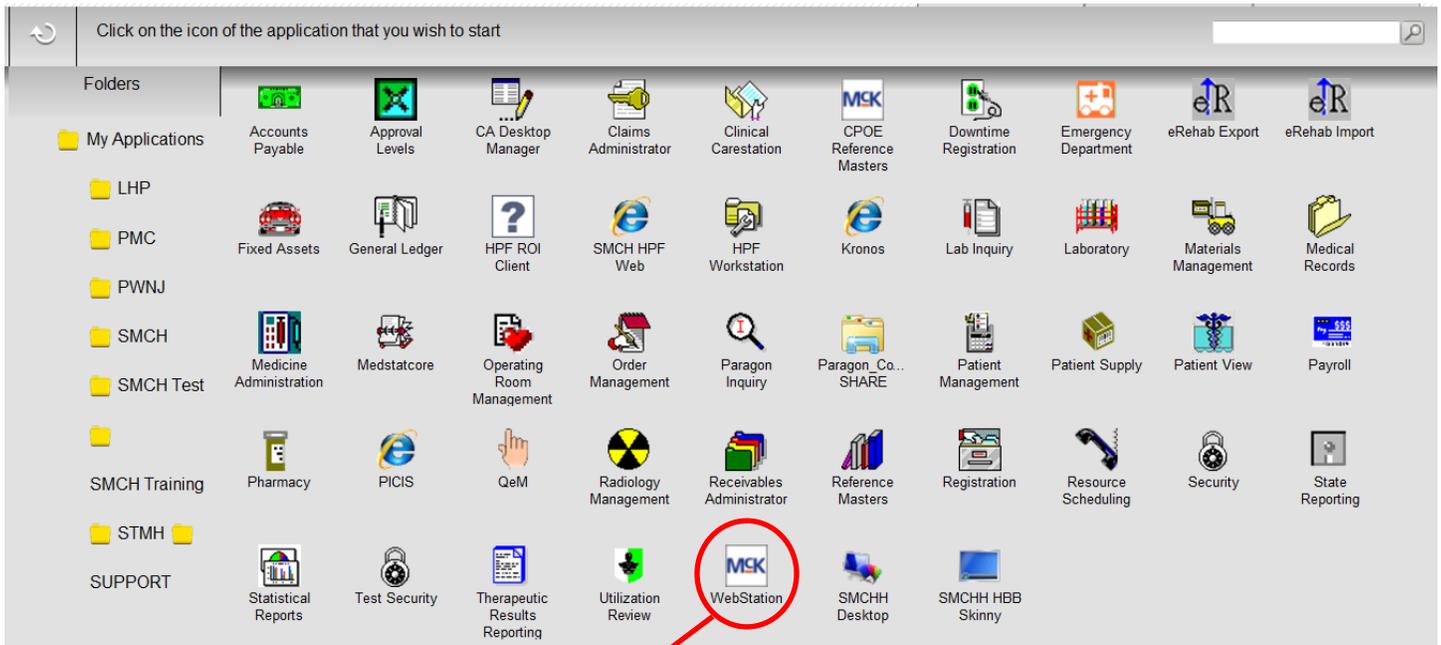

Folders

My Applications

SMCH

If this is your first time accessing vWorkspace, you may have to perform the Downloads function, but you will only have to do this one time. This function is in the upper right side of the screen.

Otherwise, click on the SMCH folder on the screen and another screen will appear for you:

From here you can access the WebStation for Physicians Site.

Single click on the Icon and it will take you to this screen:

**MCKESSON**  
*Empowering Healthcare*

**Paragon WebStation for Physicians**

Domain:

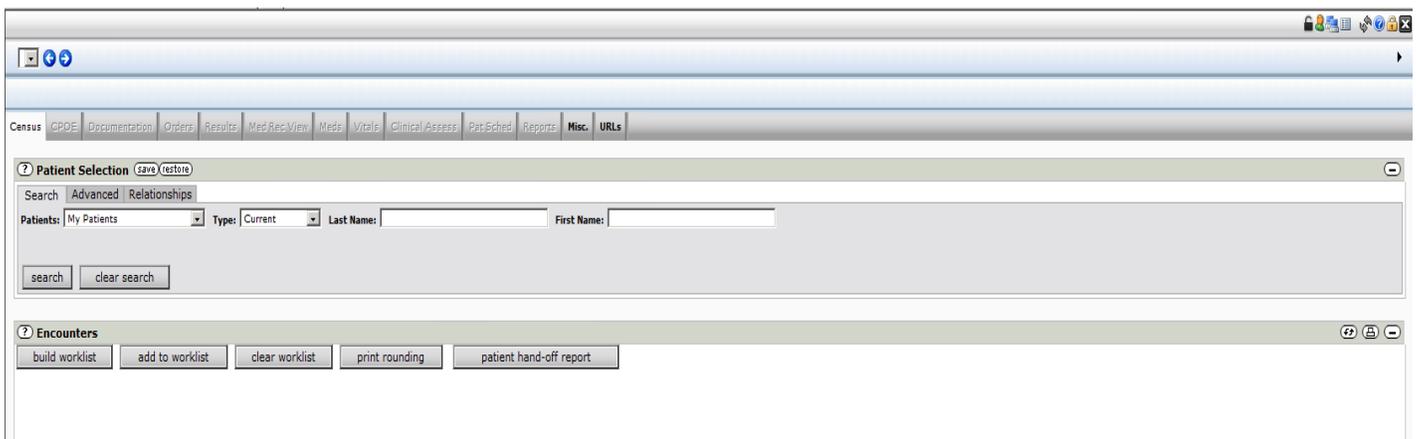

Username:

Password:

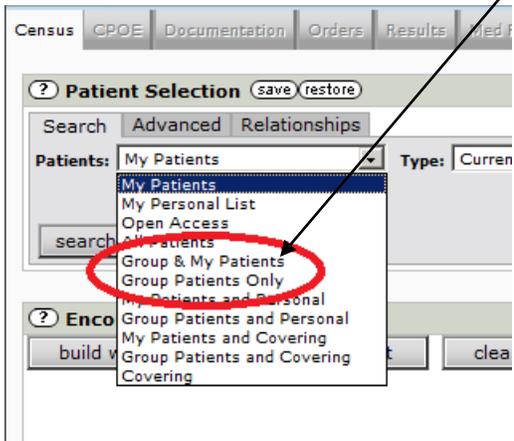

Environment:

Enter in your Username and Password and click the “Sign In” button.

This screen will appear:

In the Patient Selection Box – Click the drop down arrow and change the option to “Group & My Patients” or “Group Patient’s Only”, then click the “Search” button.

This brings up all of the patients the physician(s) in the group you are assigned. If a patient does not belong to your group, but one of your group’s doctors has ordered something on this patient, the patient will populate on the list as well.

**Encounters**

Select the patient that you want to from the patient worklist. It needs to appear in the top of the worklist box. From here you can see any and all information about the patients inpatient stay, to include, Labs, X-Rays to Nursing Documentation.

### Problem List:

This must be addressed by the Physician upon admission and Dismissal. The Problem list is on WebStation for Physician just above the Census. This assists the billers and coders determine exactly why the patient was hospitalized and if a diagnosis was resolved during the patients hospital stay.

If this box is grayed out,  this means that there has not been any information entered into the problems list for this patient.

Problem Search

Search string:   contains

cancel

The Search String will come up. If you put in pneumonia – the system will populate everything that includes pneumonia in it IF this box is checked here. It does help to be as specific as possible. But if you are unsure as to the type of (i.e. pneumonia) there are also allowances in the system for that as well.

**Problem Search**

Search string: pneumonia  contains

**The maximum number of rows has been returned. Enter additional criteria to further define selection.**

**Problem Description**

- AIDS associated pneumonia
- AIDS-associated pneumonia
- Abacterial pneumonia
- Abscess of lung with pneumonia
- Accelerated interstitial pneumonia
- Achromobacter pneumonia
- Acquired neonatal pneumonia
- Actinomycotic pneumonia
- Acute bronchial pneumonia
- Acute bronchitis due to mycoplasma pneumoniae
- Acute bronchopneumonia
- Acute eosinophilic pneumonia
- Acute gelatinous pneumonia
- Acute interstitial pneumonia
- Acute mucous pneumonia
- Acute ulcerative gastroenteritis complicating pneumonia
- Adenoviral bronchopneumonia
- Adenoviral pneumonia

There is a large database of information. Being specific helps you find what you want tremendously. Highlight the one that you want, click continue and then decide if this is a ‘Current Problem’ – which is specific only to this hospital visit and can be resolved or if it is a ‘Full Problem’ – which is something that the patient has and will not go away. (COPD, CHF, etc)

Also, enter in the date this problem was entered and the physician entering in the problem. Last name should be enough to populate the system.

If you are satisfied, Click either, ‘Add to Full’ or ‘Add to Current’ or ‘Add to Full and Current’

JST

add to worklist print facesheet

Change the Patients to “All Patients” – Type will be “Dates Ignored” – Facility will be “GBRH” – Patient Type will be “Outpatient”

Enter in whatever information that you can to help narrow down your search. Last name and first name will be enough, unless you have specific information like a Visit ID. But something should be entered into one of the fields that have a red star in front of it.

(I.e. I entered in zzzz into the last name field and it narrowed search down to 3 names.)

The Order Queue: The Order Queue tab displays the orders for the current visit for the patient. It

Description	Order Group
XXADM ADMISSION (ADULT)	OS
XXBLOOD PRODUCTS	OS
XXCS LABOR AND DELIVERY ADMIT	OS
XXD DISCHARGE	OS
XXH HOSPITALIST ADMIT	OS
XXI CARDIAC ENZYMES	OS
XXI LABS IN AM	OS
XXNEWBORN NURSERY ADMIT	OS
XXOB CESAREAN BIRTH POST-OP	OS
XXOB CESAREAN BIRTH PRE-OP	OS
XXOB LABOR AND DELIVERY ADMIT	OS
XXOB OUTPATIENT EVALUATION	OS
XXOB VAGINAL DELIVERY POSTPARTUM	OS
XXP ACE INHIBITORS AND ARB'S	OS
XXP CHOLESTEROL LOWERING MEDS	OS
XXP COMMON MEDICATION ORDERS	OS
XXP COMMON RESPIRATORY MEDICATIONS	OS
XXP DIURETICS ON FORMULARY	OS
XXP IV PREMIX	OS
XXRADIOLOGY	OS
XXTRANSFER	OS

also displays orders for previous visits when the start date of the order is within 90 days of the current date. You use the Order Queue to submit orders added from the Search tab, place orders on hold, discontinue, resume, or renew orders as well as cancel order requests and reorder (copy forward) previous orders for the patient. You may define a relationship for Pharmacy medication orders (for example, medications to be administered simultaneously) and you may also view, acknowledge and/or sign medication alerts for the selected patient from this tab.

**Order Search:** The Search module is used to search for orders and add them to the Order Queue. You can also submit an order directly from the Search module via the Order Detail. In addition, you may flag an order code to display on the Favorite Orders module.

	Description	Order Group	Status Message
Save	ABG	Other	
Remove	XXP IV PREMIX	Other Set	
Remove	XXL LABS IN AM	Order Set	
Remove	XXOB LABOR AND DELIVERY ADMIT	Order Set	Order Set was obsoleted on (07/12/2012 10:24).

**Favorite Orders:** The Favorite Orders module displays the orders that you have flagged as your favorites on the Search module. It enables you to quickly select an order code that you frequently use for a patient. You may also remove an order code from this tab if you no longer want to designate it as a favorite. If there are adjustments to an order set, there will be a status message as shown above. Just remove the order set and find the latest version in the order sets search, then add to favorites.

Type	Date Completed	Completed By	Facility
Admission	07/16/2012 21:02	PRASADA NALLURI MD, MD	SMCHH (Seton Med Center Harker Heights)

**Medication Reconciliation:** Medication Reconciliation is the process of comparing the medications a patient is taking at the time of entry to a new setting (or level of care) with those that the organization is providing. Physicians can complete Medication Reconciliation electronically from the Medication Reconciliation tab within Computerized Physician Order Entry (CPOE). The Medication Reconciliation tab in CPOE allows physicians to review the patients existing medications upon Admission, Transfer, or Discharge and easily modify, continue, or discontinue the medications.

The four basic steps of Medication Reconciliation are:

1. Develop a list of current medications and medications yet to be prescribed.
2. Clarify any questions about drug dosage and frequency.
3. Reconcile medications by documenting the reasons why medications were not continued at the facility, or why they were modified.
4. Communicate all actions taken to both the patient and the next provider of care.

# This is an example of an admission Medication Reconciliation:
